

# ENGINEERED POLYMER SOLUTIONS

## CUSTOM DESIGNS

- Application-specific solutions
- Product concept through development
- Engineer-to-engineer contact
- Designs to meet price/performance requirements

### High performance custom seals for the most demanding applications

Chesterton has been providing value-driven solutions to meet industry needs for years. We have been the manufacturer-of-choice for sealing solutions where reliability makes the difference. Our custom designs have been used around the world with documented success and recognition. Increasing equipment reliability, optimizing energy consumption, and providing local technical support and service are what Chesterton offers industry worldwide.

# WORKING WITH YOU

## TO MEET YOUR SPECIFIC NEEDS

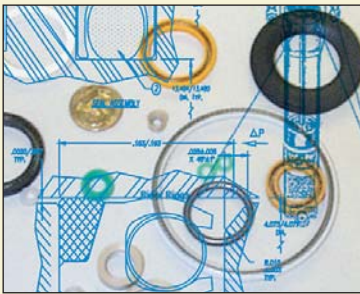

### Application-specific solutions

Chesterton has experience solving problems across a wide range of applications including actuators, valves, pumps, accumulators, presses, gear boxes, rotary shaft seals, mixers, rollers,

instrumentation, compressors, swivel joints, robotics, machining tools, and many more.

### Product concept through development

Chesterton understands that your equipment is expensive and that you need to protect your investments. This is why we work with you, from product conception through development, to determine the

appropriate product for your specific needs.

### Proven state-of-the-art materials

We exploit the full range of state-of-the-art plastics which include fluoroplastics, engineered plastics, and elastomers. These materials have been field tested and proven to withstand extreme pressure and temperature ranges as well as harsh chemical environments in the most challenging applications around the world.

ISO certifications available on [www.chesterton.com/corporate/iso](http://www.chesterton.com/corporate/iso)

### Engineer-to-engineer contact

One reason for our success is our belief in engineer-to-engineer contact for clear communication and project efficiency. Our engineering staff has spent years developing custom products for specific applications. Working with you, they can shed light on problems that impact production and maintenance, and bring solutions from comparable situations.

### Designs to meet price/performance requirements

We understand that each of our customers has unique price/performance requirements. Whether your application requires a solution for the Aftermarket, MRO or OEM, all our custom designs are developed to meet your needs while delivering a preferred value.
